

Healthy Leadership addresses patients
as well as medical staff and healthcare workers.

Healthy Leadership also addresses those responsible
for the governance and management of hospitals.

The Pope Francis Formula builds on the
personal morals and resources of individuals
or organisations who apply it, providing them
with a method guided by reason that enables
them to take action. Ethical leadership is an
art you can learn and practise.

The **octahedron** becomes a haptic tool
for The Pope Francis Formula
unblocking petrified situations.

NEW WORK BY ERNY GILLEN

Healthy Leadership in Healthcare

The Pope Francis Formula

Erny Gillen

Foreword by Cardinal
Rodríguez Maradiaga

*"The hospital, as a modern
refuge of humanity,
leads people on a journey towards
recovery, but the path is narrow
and requires conscious ethical
leadership that links everyone together
in the service of health."*

Erny Gillen

*"The eight-sided dice opens up a particular
language-game that has health and healing
at its centre. It marks out the field upon which
the crucial question to be tackled is
'Where do we go from here?'"*

Erny Gillen

*"Erny Gillen has produced a **practical
guide and syllabus**, translating Pope
Francis's concern into the situation
of sick people and hospitals."*

Cardinal Óscar Andrés Rodríguez Maradiaga
